

MARK ANTHONY RIVAS

Senior Full-Stack Developer | React | Next.js | Node.js | Web3

Dubai, UAE (Remote GMT+4) | WhatsApp: +971 589879416 | mark.anthony.rivas89@gmail.com

Portfolio: <https://markanthonyrivas.site> | GitHub: github.com/polaric89

Availability: Open to remote full-time, contract, and freelance opportunities

Time Zone Overlap: EU (5–9 hrs) | US East (8–11 hrs)

PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 10+ years of experience building scalable web, mobile, ecommerce, and blockchain applications using React, Next.js, Node.js, TypeScript, and Solidity. Proven expertise delivering end-to-end solutions across fintech, insurance, enterprise, and Web3 environments. Experienced in architecting modern frontend systems, integrating secure APIs and smart contracts, optimizing application performance, and leading distributed development efforts. Strong background in remote collaboration, scalable application architecture, and production-grade software delivery.

KEY ACHIEVEMENTS

- Delivered 50+ production web, mobile, ecommerce, and blockchain projects for international clients
- Reduced ecommerce platform load times by approximately 40% through performance optimization and caching strategies
- Reduced deployment failures by approximately 30% through CI/CD automation and automated testing pipelines
- Built and launched NFT marketplace and staking platforms using Solidity and EVM-compatible blockchain networks
- Maintained a successful 10+ year freelance practice with strong repeat business and long-term client relationships

CORE TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), React Native, Redux, Tailwind CSS, HTML5, CSS3, Accessibility

Backend: Node.js, Express.js, REST APIs, GraphQL, Microservices Architecture

Blockchain / Web3: Solidity, ERC-20, ERC-721, ERC-1155, Web3.js, Ethers.js, MetaMask, WalletConnect, Smart Contracts, NFT Marketplaces, Staking Systems

Databases: MySQL, PostgreSQL, MongoDB, Redis

Ecommerce: Shopify (Liquid, Storefront API), WooCommerce, Payment Gateway Integration

DevOps & Cloud: AWS (EC2, S3, Lambda), Docker, GitHub Actions, CI/CD Pipelines, Vercel, Cloudflare

Engineering Practices: Agile/Scrum, Code Reviews, Test-Driven Development (TDD), System Design, Performance Optimization, Security Best Practices

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer (Web3 Freelance) *Steel Spear Media-FZCO — Remote (Dubai, UAE)* Dec 2025 – Present

- Architected and delivered full-stack Web3 dApps using React, Next.js, Node.js, TypeScript, and Solidity, integrating smart contracts with production-ready user interfaces
- Developed and deployed Solidity smart contracts on EVM-compatible chains, implementing ERC-20/ERC-721 token standards, staking logic, and security-focused contract patterns
- Built responsive Next.js frontends with MetaMask and WalletConnect integrations, improving wallet onboarding and decentralized application accessibility
- Developed REST and GraphQL APIs for on-chain and off-chain data processing, implementing caching and query optimization strategies to improve scalability and responsiveness

Senior Front-End & Mobile Developer (Contract) *XFlame Tech Design LLC — Dubai, UAE* Apr 2025 – Nov 2025

- Architected a React Native mobile application across multiple internal products, creating a reusable component library to improve development speed and UI consistency
- Led React and Next.js frontend development, delivering scalable and maintainable interfaces with optimized rendering and reusable application architecture
- Integrated frontend systems with Node.js APIs covering authentication, data workflows, and secure communication between mobile and web applications
- Conducted code reviews and mentored junior developers, improving development standards and code consistency across project teams

Senior Application Developer (Team Lead) *Continental General Insurance Company — Remote (Austin, TX, USA)* Jan 2023 – Mar 2025

- Led design, development, and deployment of enterprise insurance applications serving thousands of policyholders

- Owned technical architecture planning and translated complex business requirements into scalable software solutions
- Implemented automated testing and CI/CD pipelines, reducing deployment errors by approximately 30% and improving release reliability
- Collaborated with product, design, and backend teams to improve system reliability, security compliance, and cross-functional delivery processes

Senior Full-Stack Developer (Contract Lead) *Codebluedev — Remote (New Jersey, USA)* Jan 2022 – Dec 2022

- Built scalable full-stack applications using React, Node.js, and PHP for enterprise-level clients and high-traffic platforms
- Designed and optimized MySQL, PostgreSQL, and MongoDB databases to improve performance, reliability, and scalability
- Implemented Docker-based microservices architecture to improve deployment consistency and long-term maintainability
- Integrated Stripe, PayPal, and third-party APIs into production systems, enabling secure payments and automated workflows

Senior WordPress & Shopify Developer (Contract Lead) *New Idea Web — Remote (New York, USA)* Nov 2020 – Dec 2021

- Built custom WordPress themes, plugins, and Shopify storefronts using Liquid and Shopify APIs for ecommerce clients
- Improved site performance by approximately 40% through caching, image optimization, database tuning, and code refactoring
- Implemented secure payment gateways and platform hardening practices to improve transaction security and reduce operational risk

Senior Blockchain Developer (Lead) *SYSPLEX IT Solutions — Remote / Pasay City, Philippines* May 2019 – Sep 2020

- Designed and deployed NFT marketplaces, ERC-20/ERC-721/ERC-1155 token contracts, and staking mechanisms for blockchain platforms
- Developed Solidity smart contracts using audit-ready structures, reusable contract patterns, and security-first engineering practices
- Integrated Ethereum-based networks through JSON-RPC APIs and built on-chain reward systems for decentralized applications

Independent Full-Stack Freelance Upwork & Direct Clients — *Global Remote* 2009 – Present

- Delivered 50+ end-to-end web, mobile, ecommerce, and blockchain projects across fintech, retail, media, and enterprise sectors
- Built production applications using React, Next.js, Node.js, WordPress, Shopify, and cloud-based infrastructure solutions
- Maintained a successful freelance practice for over 10 years with strong repeat business, referrals, and long-term client relationships
- Earlier roles included Senior Developer, Lead Programmer, Blockchain Specialist, and Systems Analyst for Australian, Philippine, and international clients

EDUCATION

Bachelor of Science in Computer Science

Divine Word College — Philippines
